Analyze. Inform. Improve.

an  **ECLAT**
HEALTH SOLUTIONS company

Fully integrated Software-as-a-Solution (SaaS) application that supports **Medicare Advantage, ACA, and Medicaid** by leveraging NLP/ML for **prospective and retrospective coding analysis**

Prospective Risk Adjustment CDI Solutions:

- Data-driven decision making through an NLP/ML EMR Integration for improved provider engagement
- Pre-bill encounter verification for accurate code capture at point of care
- Enhanced CDI reviews to assist in identifying gaps
- Improve documentation through coder to provider query process
- Identification of provider education opportunities through comprehensive reporting with interactive dashboards

Retrospective Solutions:

- Increased code capture with NLP/ML technology
- Actionable insights with our coding profile of previously coded charts for total code capture visibility at the member level
- Operational efficiency with comprehensive dashboards & reporting for transparent project management
- Improve coder performance with real-time coder education feedback
